# LONG SAM

An environmental sustainable  
programme in East-Kalimantan  
Indonesia since 2017

# LONG SAM projects in East Kalimantan Indonesia

## Project # 1

- WEHEA
- 22,000 ha forest
- Responsible FFN e.V.

## Project # 2

- LESAN
- 13,000 ha forest
- Responsible FFN e.V.
- Partner PELORUS JACK FOUNDATION

## Project # 3

- MEROQ
- 45,000 ha forest
- Responsible chanceforchange e.V.

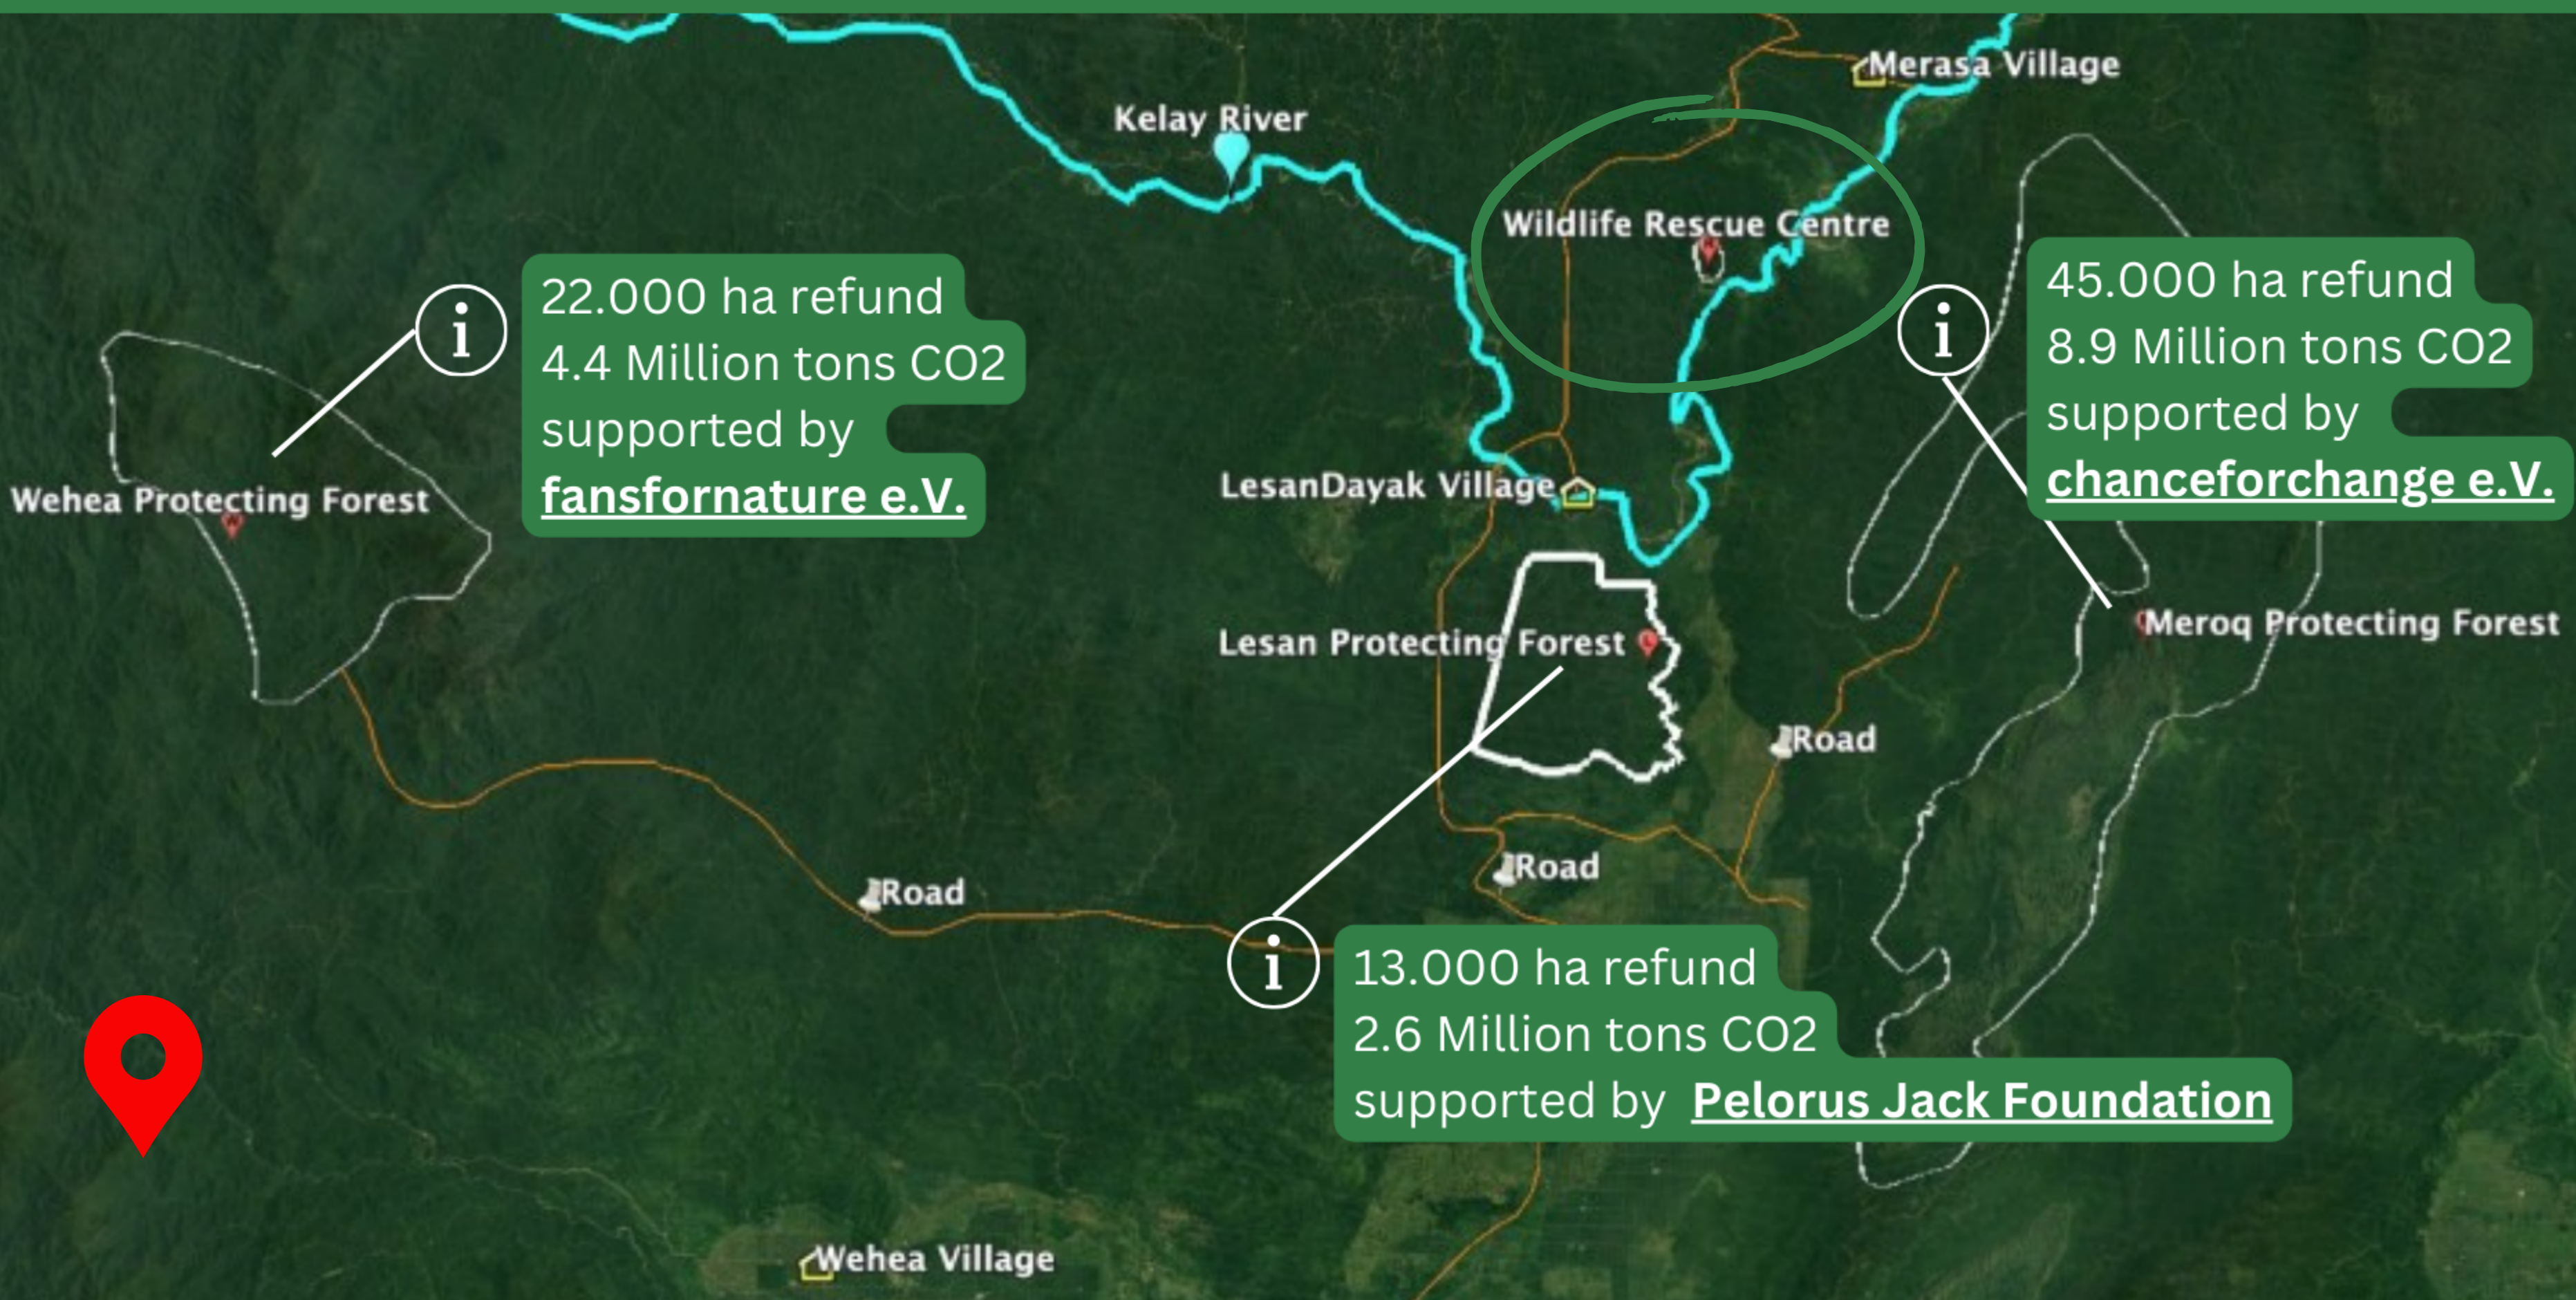

## Project # 4

- ANIMAL RESCUE CENTER
- Responsible FFN e.V.
- Partner chanceforchange e.V.
- Orang Utan Rescue (Benggalon)
- Responsible Yayasan Hutan Masa Depan
- Partner FFN e.V.

## Project # 5

- EMPOWERING THE VILLAGE
- Responsible ROTARY BALI UBUD SUNSET

# Map of protected rainforest in LONG SAM Area/ East Kalimantan initiated by Fans for Nature e.V.

# CONTENTS OF **LONG SAM**

Protect  
primary  
old-growth  
rainforest in  
East Kalimantan

Preventing release  
of CO2

Protection of  
endangered species  
of animals like  
Orang Utan and  
Sunbear

Empowering the  
Dayak villages  
and build security  
for the future of  
the people living  
there

All projects are based on this Long Sam contents and are developed sustainably step by step together with all partners, the neighbouring villages and the local government

# Programme Strategy

## PROTECT THE RAINFOREST

For example weekly patrols by trained rangers and regular reporting.

## PREVENTING RELEASE OF CO2

Every tree that is not felled prevents the release of CO2.  
See Long Sam Location Map.

## RESCUE/ RELEASE ENDANGERED ANIMALS

We finance and maintain a Wildlife Rescue Centre and pay the monthly salary of a qualified vet.

## EMPOWERING LOCAL DAYAK

We support scholarship programmes, introduce waste disposal in the villages and provide health education.

Primaten helfen Primaten

# MOTIVATION AND CHALLENGES

## SUPPORT CLEAN AIR AND WATER FOR THE WORLD AND PREVENTING RELEASE OF CO2

---

Meroq is part of Sangkulirang Mangkalihat where 54 licenses have been granted to palm oil companies, coal mining and cement mines.

## PREVENTION OF THE FOREST ECO-SYSTEM IN EAST-KALIMANTAN

---

Numerous species depend on the biodiversity of primary old-growth rainforest like Meroq but the people living there need to safe their daily needs first.

## PROTECT ENDANGERED ANIMALS

---

Protecting endangered animals like Pangolins, critically endangered. Bornean Orang Utan, threatened with extinction. Kelawat Gibbon, threatened with extinction too.

## PROMOTION OF SUSTAINABLE HARMONY AMONG ANIMALS, NATURE AND LOCAL PEOPLE

---

LONG SAM aims to improve the economy of surrounding villages, struggling with declining economies due to stagnant tourism income and comparisons to neighboring villages for prosperity.

# Stakeholders

**Universities  
in  
Indonesia**

**Other NGOs  
in Indonesia  
(COP)  
or in Germany  
(Regenwald e.V.)**

**Government  
authorities  
like Forest  
Ministry in  
Jakarta**

**Local  
Dayak  
Villages**

To ensure our work has a lasting effect and to gain the trust and support of the local people and government, we need your financial help.

# THANK YOU TERIMA KASIH DANKE
